## Reading Passage One

You should spend about 20 minutes on Questions 1-13, which are based on Reading Passage One.

## An Essential Intermediary

There is a strange irony about the blue whale. With fully grown adults reaching up to 30 metres long, and weighing in at almost 200 tons, it is not only the largest animal in the world, but also the largest to have ever existed. Yes, not even the most imposing of the dinosaurs from the Jurassic era can match this sleek streamlined aquatic mammal in scale. So, where is the irony? It lies in the fact that this huge beast feeds primarily on one of the smallest life forms in the oceans, a tiny crustacean known as krill.

Krill live in every ocean of the world. They thus come in many varieties, although all sporting a similar shrimp-like appearance, with an exoskeleton divided into three parts, and with two large antennae at the front, and pairs of legs running down the underside. These creatures are distinguishable from shrimp by their gills, which are externally mounted, and resemble rows of fibrous combs alongside their bodies. Another oddity is that their exoskeleton is usually transparent. This, and their small size, lead to the deceptive conclusion that they are an insubstantial presence, of little importance, until one is informed that an adult blue whale can consume almost 40 million krill, with a total weight of 3,600 kilograms, in just one day.

It is this, their huge numbers, which makes these mysterious ghost-like crustaceans so important. Just looking at one species, the Antarctic krill, their collective weight (or biomass) is estimated to be about 500 million tons. Putting this another way, that is over twice the weight of all human beings currently on Earth. Some scientists estimate that, each year, as much as half of this is eaten by whales, seals, penguins, squid, and fish, illustrating that krill constitute an enormous food resource for other animals. The question is whether humans can get in on the act.

Antarctic krill are the largest species, at six centimeters. Most other species are about two centimeters, and this makes them awkward to catch. Very fine fishing nets are needed,

but these are difficult to drag through the water, quickly clogged, and easily broken. In addition, when lifted in large piles, the delicate krill crush each other, forcing out their internal fluids. They must also be peeled due to the dangerously high levels of fluoride in their exoskeleton, and finally, they must be quickly prepared and frozen due to the strong enzymes in their gut, which would otherwise cause rapid putrefaction. It is problems such as these which have limited processed krill to being mostly used as fish food in aquariums or aquaculture, or bait in commercial fishing operations, but otherwise very much out of the public's mind.

Seafood-loving Japan is the only country in the world in which some krill end up on the table. The boiled, peeled, then frozen tail-meat is sold on the market, and there is some lower-grade krill-paste used as a food flavouring or colouring agent. These products originate from the small North-Pacific krill, yet it is the large Antarctic species which would seem to offer the best commercial prospects, and perhaps a more appetising meal. The majority of krill trawlers thus target the waters around coastal Antarctica, but it is a remote region, subject to harsh weather conditions, making operations there difficult and expensive, as well as raising issues of the ecological consequences, especially given the importance of krill as the basis of the food chain in that pristine and untouched environment.

Yet to explore this food chain fully, one must go smaller still. Krill themselves are filter feeders, using very fine comb-like appendages on the front of their bodies to extract microscopic organisms known as phytoplankton. These live in almost every body of water in the world, but only in the well-lit surface layers, since these organisms need exposure to sunlight, from which they obtain their energy. In the same way that plants on land are ultimately the basis of all food chains there, so too are phytoplankton in the oceans. Since krill exist in such large numbers, logically then, their primary food source must be even more numerous. There is, in fact, so much phytoplankton that their collective photosynthesis accounts for up to half of the oxygen produced in the world.

However, as with krill, the vast numbers of phytoplankton live unnoticed and unobserved. Their presence can only be indirectly deduced when they are pressed together by currents, where there can be correspondingly high concentrations of krill feeding on them. This can similarly result in the usually solitary blue whales being found together, and revealing one of the most remarkable and elusive food chains in nature: from phytoplankton, to krill, to the blue whale. In other words, from the tiniest elements in nature, in two short steps leading to a mighty and awe-inspiring leviathan of the deep, the largest animal that has ever existed. And the small ghostly krill are the essential intermediary in this wondrous process.

## Questions 1-4

Do the following statements agree with the information given in Reading Passage

One?

Write

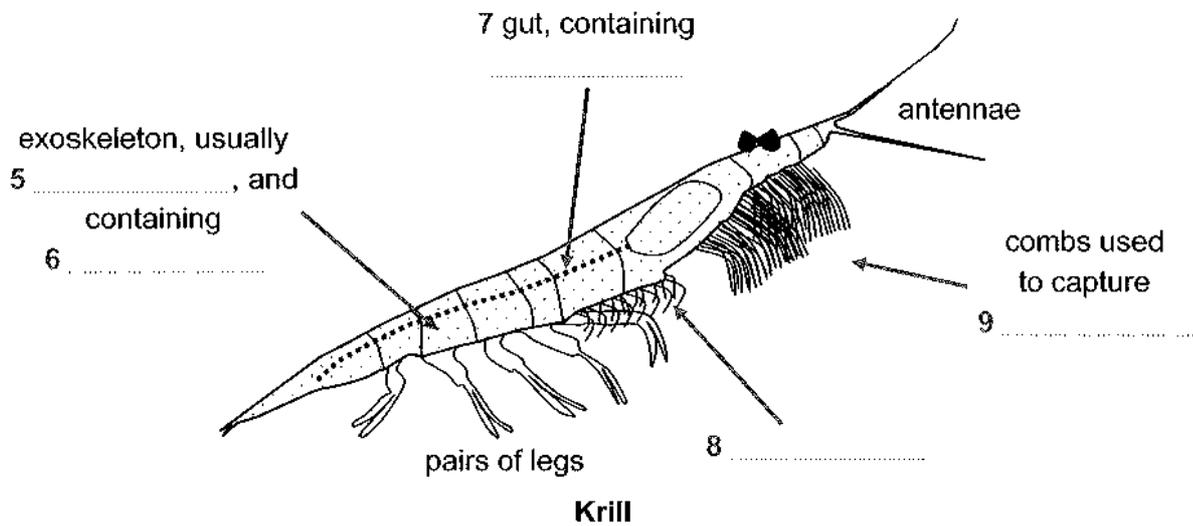

<b>TRUE</b>	if the statement agrees with the information
<b>FALSE</b>	if the statement contradicts the information
<b>NOT GIVEN</b>	If there is no information on this

- 1  Some dinosaurs were bigger than the blue whale.
- 2  The blue whale does not only eat krill.
- 3  Some krill are smaller than shrimp.
- 4  There are about 500 million tons of krill in the ocean.

### Questions 5-9

Complete the diagram.

Choose ONE WORD from the passage for each answer.

- 5 \_\_\_\_\_
- 6 \_\_\_\_\_
- 7 \_\_\_\_\_
- 8 \_\_\_\_\_
- 9 \_\_\_\_\_

## Questions 10-13

Choose the correct letter, A, B, C, or D.

10 Fishing for krill is

- A not too difficult.
- B mostly done in Antarctic waters.
- C mostly done in Japanese waters.
- D done with large fishing nets.

11 Krill

- A move like ghosts.
- B are processed soon after capture.
- C are mostly used for human consumption.
- D come in two varieties.

12 Phytoplankton

- A outnumber krill.
- B produce over half of the oxygen in the world.
- C can be seen with the naked eye.
- D can live anywhere in the ocean.

13 Blue whales

- A are a very large species of fish.
- B can weigh 200 tons.
- C prefer to be alone.
- D are in the middle of a food chain.

# Reading Passage Two

You should spend about 20 minutes on Questions 14-26, which are based on Reading Passage Two.

## A Meat-Eater's Counter

A. You might be forgiven sometimes for thinking that vegetarians are somehow superior human beings. In today's climate of New Age spiritualism, animal rights, and Mother Earth naturalism, confirmed meat-eaters must necessarily be categorised as selfish, environmentally-irresponsible, spiritually-deprived gluttons, whose dietary desire is akin to cannibalism. Each lamb chop, carving of roast beef, or chicken drumstick, signifies a brutal execution of a sentient animal, to whose suffering we remain callously indifferent. Here, I would like to offer some arguments to counter the more extreme claims of the bean-sprout crowd.

B. Vegetarians' first justification is that eating meat is cruel to animals. But when pondering cruelty, it may pay to reflect on how animals fare in the wild. I was recently watching a documentary concerning herbivores on the African plains — where the parasite and insect-tormented herds lead lives of hair-raising and nerve-jittering bolts and dashes as they are constantly stalked by a range of predators. Now, compare this to the animals munching grass in our domestic pastures. Our four-legged friends, watered, well-fed, and attended to when sick, have an essentially stress-free and easy existence.

C. But, the vegetarians claim, our slaughterhouses deal out brutal deaths. Brutal? Let us reflect again on that documentary. At one point, it showed an injured zebra, an animal which was quickly spotted by a pack of hyenas. The rest was a display of such cruelty and barbarity that it would make vegetarians think twice before intoning the mantra that 'nature is good'. Yet being viciously torn to pieces by snapping jaws is more or less the

inevitable end of most animals in the wild. It is simply a fact that they do not expire peacefully — they face, instead, brutalising and painful exits. If not becoming another animal's dinner, they starve to death, or are victims of floods, droughts, and other merciless acts of nature. Compared to this, the relatively quick and clean death that we humans deliver to our cud-chewing cousins must be considered a privileged way to go.

**D.** So, eating meat is not 'cruel' — at least, not compared to the natural world, and in fact can even allow the animals in question a certain quality of life that they would almost certainly never enjoy in the wild. But the vegetarians counter that, we, the human species, have a higher awareness, and should avail ourselves of other forms of food, rather than causing the deaths of living creatures. Yet it is worth realising that for tens of thousands of years our species did not have this luxury of choice. Killing animals was essential in staying alive. It is only very recently (in terms of human history), that society has reached a stage of affluence whereby a sufficiently high amount of non-animal nutrition can be obtained, and then only by a privileged and small percentage of the world's population. Thus, the argument from moral high ground is, at best, an arbitrary one.

**E.** But then the vegetarians come out with their next core claim to superiority — that their diet is healthier. Eating meat is going to have such nasty consequences for the heart, lungs, kidneys, and immune system that we will end up in an early grave. One can agree that this may be true for people who eat too much meat, but is it true for those who eat meat in proportion with an otherwise balanced diet? So many dubious facts and figures are produced to 'prove' the vegetarians' viewpoint that I would recommend a quick read of a well-known book entitled, 'How to lie with statistics'. This emphasises two foundations for statistical validity: gaining truly representative samples, and eliminating outside variables, both of which the green-eaters ignore.

**F.** It is the second point I would like to look at. The lean and fit, health-conscious vegetarian doing his daily yoga and nightly guitar-strumming will certainly live much longer, on average, than the meat-eating, chain-smoking, beer-swilling, donut-chomping couch potatoes of this world, but not necessarily due (or in any way related) to the former's abstinence from meat. It is not hard to deduce that those cigarettes, beer, donuts, and sedentary lifestyle are almost certainly responsible for the meat-eater's diminished life expectancy. For a true comparison, one must compare lean and fit, health-conscious vegetarians with lean and fit, health-conscious non-vegetarians, the latter of whom mix moderate amounts of meat in their diet.

**G.** And this is the point. It is almost impossible in this complex, mixed, and multi-faceted modern society to find enough people who can constitute a truly representative sample, while eliminating the many outside variables. Any assertion that statistics 'prove' vegetarians live longer must note that these vegetarians have already made (compared to the average sofa sprouts) a very rigorous and disciplined health-enhancing lifestyle

change, which is probably accompanied with many other similar choices, all of which are almost certainly the real cause of any statistical trends. Factor these into the equation, and so far there is no convincing statistical evidence that vegetarianism is better for the health.

## Questions 14-19

Reading Passage Two has seven paragraphs, A-G.

Choose the correct heading for Paragraphs B-G from the list of headings.

Write the correct number, i—x, for each answer.

List of Headings	
i	Animals attack
ii	Needless killing countered
iii	Better people?
iv	A need for statistics
v	The real cause of longer lives
vi	Untrustworthy numbers
vii	Cruel killing countered
viii	Comparing lives
ix	Quick efficient killing
x	The real cause of early deaths

Example	Answer
Paragraph A	...iii...

14	<input type="text"/>	Paragraph B
15	<input type="text"/>	Paragraph C
16	<input type="text"/>	Paragraph D
17	<input type="text"/>	Paragraph E
18	<input type="text"/>	Paragraph F

19 <input type="text"/>	Paragraph G
-------------------------	-------------

### Questions 20-23

Complete the table.

Choose **NO MORE THAN THREE WORDS** from the passage for each answer.

	Domestic Animals	Wild Animals
Life is	20 <input type="text"/>	threatened by numerous 21 <input type="text"/>
Death is	22 <input type="text"/>	brutalising and painful.
They	have some 23 <input type="text"/>	are unlikely to have this easy existence.

### Questions 24-26

Complete the table.

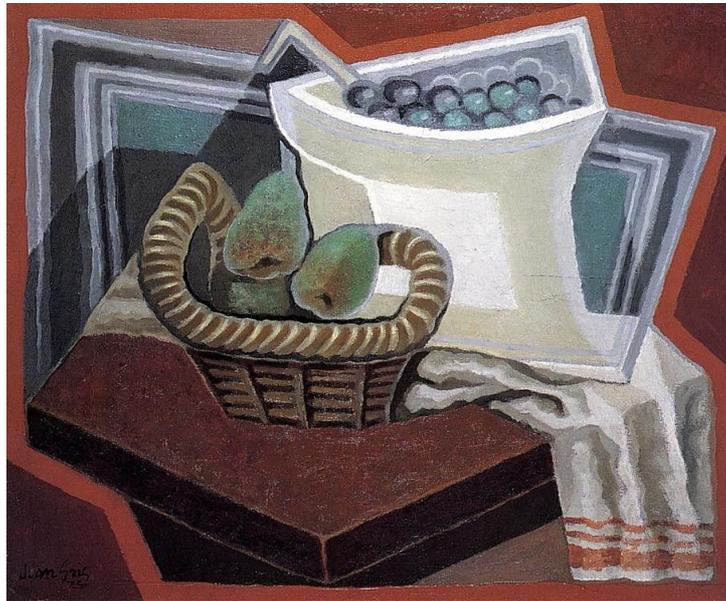

Choose **NO MORE THAN TWO WORDS** from the passage for each term.

Find two interesting terms used in the text to refer to

	One Term	Another Term
vegetarians.	bean-sprout crowd	24 <input type="text"/>
sheep and cattle.	25 <input type="text"/>	cud-chewing cousins
lazy people.	couch potatoes	26 <input type="text"/>

# Reading Passage Three

You should spend about 20 minutes on Questions 27-40, which are based on Reading Passage Three.

## Cubism

When the name of Picasso is spoken, the concept of ‘Cubism’ usually springs to mind. That this happens indicates just how deep and long-lasting has been its influence on the world, yet although many people know of the name ‘Cubism’, few can speak about it with any degree of conversancy. It is Georges Braque who is now credited as an equal pioneer in this revolutionary art movement, but claiming that these two artists alone created cubism oversimplifies a very complex issue.

Defining Cubism itself is difficult. At its simplest, the three-dimensional object being painted can be considered broken into pieces, sometimes square or cube-shaped (hence the name). These are reassembled in less than coherent order, and often at different angles. They can overlap, and sometimes more than one view is presented at the same time, moving beyond the limits of a fixed observer. The terms ‘multiple viewpoints’ and ‘mobile perspectives’ are often used — that is, the subject is captured from different angles, at different times, with the corresponding images fused into a single picture.

Braque’s pre-war paintings began experimenting with this idea, which inevitably led to an association with Picasso, who had been dabbling also in rendering three-dimensional views into two-dimensional geometric shapes — for example, in his painting *Young Ladies of Avignon* — often labelled ‘proto-cubist’. Some even consider this painting to be the true beginning of Cubism itself, as it inspired Braque to follow the lead, developing the movement towards its trademark features.

Yet both artists were influenced by earlier painters, in particular, the later works of Cezanne. Cezanne was one of the first to divide the canvas into several views, as well as to begin presenting natural objects in geometric figures.

Paul Cezanne had died in 1906, but a year later several museums exhibited his paintings in a retrospective of the artist's life. Inevitably, young painters in the Parisian art scene, including Picasso and Braque, would have seen these. Whilst not yet fractured into facets or cubes, Cezanne occasionally implanted an underlying geometry—for example, in one of his most famous (and unfinished) paintings, *The Bathers*. This work breaks tradition in its unflattering portrait of the women, whose naked forms are rendered in sharp symmetry, also forming a triangular pattern with the river and trees. It is said to have inspired Picasso's very similarly styled work, mentioned previously.

Moving beyond those early years of Cubism, many other artists were exploring the same idea, but taking it in individual directions. They are often unfairly considered as having played less significant roles simply because they did not adhere to the strict perspectives of Braque or Picasso. Yet, conceivably they could have evolved their own awareness of Cubism more from Cezanne's pervading and almost universal influence on the Parisian art scene of that day, meaning that they must now be considered true innovators in their own right. Juan Gris, for example, produced many interesting works, yet now remains little regarded. Interestingly, being a compatriot of Picasso, the two artists became personally acquainted, to the extent that Gris painted his well-known *Portrait of Picasso*, now regarded as one of the best examples of the Cubist style.

Gris ventured beyond the monochromatic (or single family of colours) employed by Picasso and Braque. He combined vibrant hues in interesting and sometimes unusual combinations, such as in his still life, *Newspaper and Fruit Dish*. Similarly exploratory were the Orphic Cubists (as they would later become known), who moved further towards abstraction, but with Gris's similar use of bright colours. These were used to convey meaning but blended in a way that went beyond the physical subject. Its main proponent was the Frenchman, Robert Delaunay, who, together with his wife, regularly exhibited in Parisian salons with increasingly non-representational forms. His *Simultaneous Windows* is barely recognisable as a window—just a blend of prismatic hues with one prominent square, giving a hint of three-dimensionality.

Léger also followed a more personal form of Cubism. As with most of his generation, he had seen the Cezanne 1907 retrospective, which enkindled interest in experimentation with geometric forms. This eventually led to the completely abstract, in which tubes, cones, and cubes, are all splayed on the canvas in bold primary colours — seen, for example, in his *Railway Crossing*. Merc, in spite of its non-representational quality, is the suggestion of the harsh mechanisation and alienation of modern life, a theme which the artist's experiences in World War One only accentuated, and which pre-dates similar

trends (such as pop art) by decades.

Clearly, Cubism was a complex art movement, and names such as Analytical, Synthetic, and Orphic Cubism are constructs which were invented long after the events and artworks which they

attempt to describe. These names appear to give a coherent order to what was actually a collective movement in which many individuals contributed. Among all this confusion, one does not doubt that the early years of last century were a fascinating period in the Parisian art scene.

## Questions 27-31

Answer the questions.

Choose the correct letter, **A-F**, for each answer.

**NB** You can use an **answer more than once**.

Which painter

A	Braque
B	Cezanne
C	Delaunay
D	Gris
E	Léger
F	Picasso

- 27  led a new abstraction movement?
- 28  was the most influential?
- 29  was affected by a global conflict?
- 30  is inevitably linked with an art movement?
- 31  was married?

## Questions 32-37

Answer the questions.

Choose the correct letter, **A-F**, for each answer.

NB You can use an **answer ONLY once**.

A	Newspaper and Fruit Dish
B	Portrait of Picasso
C	Railway Crossing
D	Simultaneous Windows
E	The Bathers
F	Young Ladies of Avignon

Which painting is

- 32  a confusing abstraction in many colours?
- 33  a darker view, ahead of its time?
- 34  probably the first of its kind?
- 35  an intriguing and multi-chromatic view?
- 36  very representative of its type?
- 37  an early painting which influenced another?

### Questions 38-40

Choose the correct letter, A, B, C, or D.

38 The Cezanne Retrospective

- A was attended by Cezanne.
- B showed his Cubist paintings.
- C was attended by very many people.
- D influenced an artist to move to non-representational style.

39 Many Cubist innovators

- A preferred still-life paintings.
- B favoured monochrome.

- C invented names for their styles.
- D were not adequately recognised.

40 Cubism

- A is fairly easily explained.
- B has cubes in incoherent order.
- C shows different views of a subject.
- D was created by Picasso and Braque.

**Solution:**

- 1 FALSE
- 2 TRUE
- 3 NOT GIVEN
- 4 FALSE
- 5 transparent
- 6 fluoride
- 7 enzymes
- 8 gills
- 9 phytoplankton
- 10 B
- 11 B
- 12 A
- 13 C
- 14 viii
- 15 vii
- 16 ii
- 17 vi
- 18 x
- 19 v
- 20 stress-free and easy

- 21 predators
- 22 quick and clean
- 23 quality of life
- 24 green-eaters
- 25 four-legged friends
- 26 sofa sprouts
- 27 C
- 28 B
- 29 E
- 30 F
- 31 C
- 32 D
- 33 C
- 34 F
- 35 A
- 36 B
- 37 E
- 38 D
- 39 D
- 40 C

## Review and Explanations

1 Answer: **FALSE**

Keywords in Questions	Similar words in Passage
<p><b>Q1:</b> Some dinosaurs were bigger than the blue whale.</p>	<p>It is the largest to have ever existed. Yes, not even the most imposing of the dinosaurs from the Jurassic era can match this sleek streamlined aquatic mammal in scale.</p>
<p><b>Note:</b> In paragraph 1, it is stated that <b>blue whale is the largest to have ever existed</b> and the biggest dinosaur can not match this mammal in scale. This information contrasts with the content of <b>Q1</b> Therefore, the answer of <b>Q1</b> is <b>FALSE</b>.</p>	

2 Answer: **TRUE**

Keywords in Questions	Similar words in Passage
<p><b>Q2:</b> The blue whale does not only eat krill.</p>	<p>This huge beast feeds primarily on one of the smallest life forms in the oceans, a tiny crustacean known as krill.</p>
<p><b>Note:</b> In paragraph 1, it is stated that the blue whale feeds primarily on krill. It means that the blue whale mostly eats krill, not only eats krill. This information confirms the content of <b>Q2</b> Therefore, the answer of <b>Q2</b> is <b>TRUE</b>.</p>	

3 Answer: **NOT GIVEN**

Keywords in Questions
<p><b>Q3:</b> Some krill are smaller than shrimp.</p>
<p><b>Note:</b> Paragraph 2 is about the comparison between krill and shrimp. However, there is no information about the comparison between their size. Therefore, the answer of <b>Q3</b> is <b>NOT GIVEN</b>.</p>

4 Answer: **FALSE**

Keywords in Questions	Similar words in Passage
<p><b>Q4:</b> There are about 500 million tons of krill in the ocean.</p>	<p>Just looking at one species, the Antarctic krill, their collective weight (or bio-mass) is estimated to be about 500 million tons.</p>

**Note:**

In paragraph 3, it is stated about 500 million tons is the collective weight (or bio-mass) of the Antarctic krill, **not all species of krill in the ocean**.

This information contrasts to the content of **Q4**

Therefore, the answer of **Q4** is **FALSE**.

5 Answer: **transparent**

Complete a diagram: **Q5 - Q9**

**Strategy:**

Study the diagram and question carefully

Use the labels you are given in the question to help you understand the diagram

Keywords in Questions	Similar words in Passage
<b>Q5:</b> exoskeleton, usually _____,	Another oddity is that their exoskeleton is usually transparent
<b>Note:</b> In paragraph 2, it is stated that krill's exoskeleton is usually <b>transparent</b> Therefore, the answer of <b>Q5</b> is <b>transparent</b> .	

6 Answer: **fluoride**

Keywords in Questions	Similar words in Passage
<b>Q6:</b> and containing _____	They must also be peeled due to the dangerously high levels of fluoride in their exoskeleton.
<b>Note:</b> In paragraph 4, it is stated krill's exoskeleton contains high levels of <b>fluoride</b> . Therefore, the answer of <b>Q6</b> is <b>fluoride</b> .	

7 Answer: **enzymes**

Keywords in Questions	Similar words in Passage
<b>Q7:</b> gut containing _____	they must be quickly prepared and frozen due to the strong enzymes in their gut.
<b>Note:</b> In paragraph 4, it is stated krill's gut contains strong <b>enzymes</b> . Therefore, the answer of <b>Q7</b> is <b>enzymes</b> . Remember that the answer must be in plural form	

8 Answer: **gills**

Keywords in Questions	Similar words in Passage
-----------------------	--------------------------

<b>Q8:</b> _____	These creatures are distinguishable from shrimp by their gills, which are externally mounted, and resemble rows of fibrous combs alongside their bodies.
<p><b>Note:</b>          In paragraph 2, it is stated that krill's <b>gills</b> are externally mounted, and resemble rows of fibrous combs alongside their bodies.          This description matches <b>Q8</b> of the diagram.          Therefore, the answer of <b>Q8</b> is <b>gills</b>. Remember that the answer must be in plural form</p>	

9 Answer: **phytoplankton**

Keywords in Questions	Similar words in Passage
<b>Q9:</b> combs used to capture _____	Krill themselves are filter feeders, using very fine comb-like appendages on the front of their bodies to extract microscopic organisms known as phytoplankton.
<p><b>Note:</b>          In paragraph 6, it is stated krill uses their comb to capture <b>phytoplankton</b>.          Therefore, the answer of <b>Q9</b> is <b>phytoplankton</b>.</p>	

10 Answer: **B**

<p><i>Multiple choice question: Q10 - Q13</i>  <b>Strategy:</b>          Read the question carefully and eliminate any answers which are obviously wrong          Scan read for parallel expressions in the questions and passage and underline them          Remember: a) the correct answer to the question is the one given in the passage, not your own opinion; b) words from an incorrect opinion may appear in the passage</p>	
Keywords in Questions	Similar words in Passage
<b>Q10:</b> Fishing for krill is not too difficult mostly done in Antarctic waters mostly done in Japanese done with large fishing nets	The majority of krill trawlers thus target the waters around coastal Antarctica.

**Note:**

**A:** In paragraph 4, it is stated that fishing for krill needs very fine fishing nets and it is really difficult. Hence, **A** is **incorrect**.

**B:** The content of B is similar to what the author said in paragraph 4. For that reason **B** is **correct**.

**C:** It can be inferred from paragraph 5 that krill are mostly consumed in Japan. However, these products originate from Antarctica. Therefore, **C** is **incorrect**

**D:** In paragraph 4, it is stated that fishing for krill need very fine fishing nets. However, the passage does not mention that fishing for krill is done with large fishing nets. Therefore, **D** is **incorrect**

11 Answer: **B**

Keywords in Questions	Similar words in Passage
<p><b>Q11:</b> Krill move like ghosts are processed soon after capture are mostly used for human consumption come in two varieties</p>	<p>They must be quickly prepared and frozen due to the strong enzymes in their gut</p>

**Note:**

**A:** In the passage, krill are described as mysterious ghost-like crustaceans. However, there is no information about which aspect of krill that is like ghosts. Therefore, **A** is **incorrect**

**B:** The content of B is similar to what the author said in paragraph 4. For that reason **B** is **correct**.

**C:** In paragraph 5, it is stated that seafood-loving Japan is the only country in the world in which some krill end up on the table. It means that krill are only consumed in Japan, **not by all people around the world**. Therefore, **C** is **incorrect**

**D:** In paragraph 2, it is stated that krill come in many varieties, not only 2 varieties. Therefore, **D** is **incorrect**

12 Answer: **A**

Keywords in Questions	Similar words in Passage
<p><b>Q12:</b> Phytoplankton outnumber krill produce over half of the oxygen in the world can be seen with the naked eye can live anywhere in the ocean</p>	<p>Since krill exist in such large numbers, logically then, their primary food source must be even more numerous.</p>

**Note:**

**A:** The content of A is similar to what the author said in paragraph 6. For that reason **A** is **correct**.

**B:** In paragraph 6, it is stated that phytoplankton’s collective photosynthesis accounts for **up to (maximum)** half of the oxygen produced in the world, **not over half of the oxygen in the world**. Therefore, **B** is **incorrect**.

**C:** In paragraph 7, it is stated that the vast numbers of phytoplankton live unnoticed and unobserved. Therefore, **C** is **incorrect**

**D:** In paragraph 6, it is stated that phytoplankton only live in the well-lit surface layers, **not anywhere in the ocean**. Therefore, **D** is **incorrect**

13 Answer: **C**

Keywords in Questions	Similar words in Passage
<p><b>Q13:</b> Blue whales are a very large species of fish can weigh 200 tons prefer to be alone are in the middle of a food chain</p>	<p>This can similarly result in the usually solitary blue whales being found together</p>

**Note:**

**A:** It can be inferred from paragraph 1 that blue whale is a aquatic mammal, **not a species of fish**. Therefore, **A** is **incorrect**.

**B:** In paragraph 1, it is stated that fully grown blue whales can weigh **almost** 200 tons. Therefore, **B** is **incorrect**.

**C:** In paragraph 7, blue whales are describe as a solitary animal. It means that they prefer to be alone. For that reason, **C** is **correct**.

**D:** In paragraph 7, it is stated that one of the most remarkable and elusive food chains in nature: from phytoplankton, to krill, to the blue whale. It means that blue whales are in the end of the food chain. Therefore, **D** is **incorrect**.

14 Answer: **viii**

Matching headings: **Q14- Q19**

**Strategy:**

Read each section for a general idea of its meaning and purpose. The main idea of a paragraph is usually given in the first or topic sentence.

Look in the passage for repetitions of words in the headings and for synonyms or parallel expressions.

Choose the heading which best describes the overall meaning of the section. A heading which picks up on a detail or an example is usually not the correct answer.

Keywords in Questions	Similar words in Passage
-----------------------	--------------------------

<p><b>Q14:</b> VIII - Comparing lives</p>	<p>Vegetarians' first justification is that eating meat is cruel to animals. But when pondering cruelty, it may pay to reflect on how animals fare in the wild. I was recently watching a documentary concerning herbivores on the African plains — where the parasite and insect-tormented herds lead lives of hair-raising and nerve-jittering bolts and dashes as they are constantly stalked by a range of predators. Now, compare this to the animals munching grass in our domestic pastures. Our four-legged friends, watered, well-fed, and attended to when sick, have an essentially stress-free and easy existence.</p>
<p><b>Note:</b> Paragraph B is about comparing the threatened life of wild animals and the stress-free and easy existence of domestic ones. The main idea of paragraph B is similar with option VIII. For that reason, the answer of <b>Q14</b> is <b>VIII</b>.</p>	

15 Answer: vii

Keywords in Questions	Similar words in Passage
<p><b>Q15:</b> VII - Cruel killing countered</p>	<p>But, the vegetarians claim, our slaughterhouses deal out brutal deaths. Brutal? Let us reflect again on that documentary. At one point, it showed an injured zebra, an animal which was quickly spotted by a pack of hyenas. The rest was a display of such cruelty and barbarity that it would make vegetarians think twice before intoning the mantra that 'nature is good'...</p>
<p><b>Note:</b> Paragraph C is about options and illustrations given by the author to counter the vegetarians claim about cruel killing. The main idea of paragraph C is similar with option VIII. For that reason, the answer of <b>Q15</b> is <b>VII</b>. The last sentence of paragraph C mentions about the quick efficient killing for domestic animals. However it is not the main idea of paragraph C. Therefore, <b>IX</b> is <b>incorrect</b>.</p>	

16 Answer: ii

Keywords in Questions	Similar words in Passage
<p><b>Q16:</b> II - <b>Needless killing</b> <b>countered</b></p>	<p>So, eating meat is not 'cruel' — at least, not compared to the natural world, and in fact can even allow the animals in question a certain quality of life that they would almost certainly never enjoy in the wild. But the vegetarians <b>counter</b> that, we, the human species, have a higher awareness, and <b>should avail ourselves of other forms of food, rather than causing the deaths of living creatures.</b> Yet it is worth realising that for tens of thousands of years our species did not have this luxury of choice. Killing animals was essential in staying alive...</p>
<p><b>Note:</b>            In paragraph D, vegetarians claim that it is needless to kill and eat animals. However, this claim is countered by opinions and illustrations of the author.            The main idea of paragraph D is similar with option II. For that reason, the answer of <b>Q16</b> is <b>II</b>.</p>	

17 Answer: **vi**

Keywords in Questions	Similar words in Passage
<p><b>Q17:</b> VI - <b>Untrustworthy</b> <b>numbers</b></p>	<p>... So many <b>dubious facts and figures</b> are produced to 'prove' the vegetarians' viewpoint that I would recommend a quick read of a well-known book entitled, 'How to lie with statistics' ...</p>
<p><b>Note:</b>            Paragraph E is about <b>untrustworthy numbers given by vegetarians in order to prove their point of view.</b>            The main idea of paragraph E is similar with option VI. For that reason, the answer of <b>Q17</b> is <b>VI</b>.</p>	

18 Answer: **x**

Keywords in Questions	Similar words in Passage
-----------------------	--------------------------

<p><b>Q18:</b> X - The real cause of early deaths</p>	<p>... It is not hard to deduce that those cigarettes, beer, donuts, and sedentary lifestyle are almost certainly responsible for the meat-eater's diminished life expectancy. For a true comparison, one must compare lean and fit, health-conscious vegetarians with lean and fit, health-conscious non-vegetarians, the latter of whom mix moderate amounts of meat in their diet.</p>
---	---

**Note:**  
 In paragraph F, it is stated that the real cause of early deaths are cigarettes, beer, donuts, and sedentary lifestyle, not meat. .  
 The main idea of paragraph F is similar with option X. For that reason, the answer of **Q18** is **X**.

19 Answer: **v**

Keywords in Questions	Similar words in Passage
<p><b>Q19:</b> V - The real cause of longer lives</p>	<p>... Any assertion that statistics 'prove' vegetarians live longer must note that these vegetarians have already made (compared to the average sofa sprouts) a very rigorous and disciplined health-enhancing lifestyle change, which is probably accompanied with many other similar choices, all of which are almost certainly the real cause of any statistical trends ...</p>

**Note:**  
 In paragraph G, it is stated that the real cause of longer lives is a rigorous and disciplined health-enhancing lifestyle.  
 The main idea of paragraph G is similar with option . For that reason, the answer of **Q19** is **V**.

20 Answer: **stress-free and easy**

Keywords in Questions	Similar words in Passage
<p><b>Q20:</b> Domestic Animals            Life is ____</p>	<p>Our four-legged friends, watered, well-fed, and attended to when sick, have an essentially stress-free and easy existence.</p>

**Note:**

The blank should be **adjective** used to **describe the life of domestic animals**

Paragraph B is about comparing lives of wild animals and domestic ones. Hence the answer may appear here.

In paragraph B, it is stated that **domestic animals have an essentially stress-free and easy existence.**

Therefore, the answer of **Q20** is **“stress-free and easy”**

21 Answer: **predators**

Keywords in Questions	Similar words in Passage
<b>Q21:</b> Wild Animals Life is: threatened by numerous ____	They are constantly stalked by a range of predators.
<b>Note:</b> The blank should be <b>noun</b> which <b>can threaten wild animals.</b> Paragraph B is about comparing lives of wild animals and domestic ones. Hence the answer may appear here. In paragraph B, it is stated that <b>wild animals constantly threatened by numerous predators.</b> Therefore, the answer of <b>Q21</b> is <b>“predators”</b> . Remember that the answer must be in plural form	

22 Answer: **quick and clean**

Keywords in Questions	Similar words in Passage
<b>Q22:</b> Domestic Animals Death is ____	Compared to this, the relatively quick and clean death that we humans deliver to our cud-chewing cousins must be considered a privileged way to go.
<b>Note:</b> The blank should be <b>adjective</b> used to <b>describe the death of domestic animals</b> Paragraph C mentions the comparison between the death of domestic and wild animals. Hence the answer may appear here. In paragraph C, it is stated that <b>the death of domestic animals is quick and clean.</b> Therefore, the answer of <b>Q22</b> is <b>“quick and clean”</b>	

23 Answer: **quality of life**

Keywords in Questions	Similar words in Passage
<b>Q23:</b> Domestic Animals They have some ____	Eating meat is not ‘cruel’ — at least, not compared to the natural world, and in fact can even allow the animals in question a certain quality of life that they would almost certainly never enjoy in the wild.

**Note:**

The blank should be **noun**.

In paragraph D, it is stated that domestic animals have some **quality of life** that wild ones are unlikely to have.

Therefore, the answer of **Q23** is **“quality of life”**

24 Answer: **green-eaters**

Keywords in Questions	Similar words in Passage
<b>Q24: Vegetarians</b> _____	So many dubious facts and figures are produced to ‘prove’ the <b>vegetarians</b> ’ viewpoint that I would recommend a quick read of a well-known book entitled, ‘How to lie with statistics’. This emphasises two foundations for statistical validity: gaining truly representative samples, and eliminating outside variables, both of which the green-eaters ignore.
<b>Note:</b> Considering every details in the question and paragraph E, it can be seen that the phrase <b>“green-eaters”</b> is the parallel expression of “vegetarians”. Therefore, the answer of <b>Q24</b> is <b>“green-eaters”</b> . Remember that the answer must be in plural form	

25 Answer: **four-legged friends**

Keywords in Questions	Similar words in Passage
<b>Q25: Sheep and cattle</b> _____	Now, compare this to the <b>animals munching grass in our domestic pastures</b> . Our four-legged friends, watered, well-fed, and attended to when sick, have an essentially stress-free and easy existence.
<b>Note:</b> Considering every details in the question and paragraph B, it can be seen that the phrase <b>“four-legged friends”</b> is the parallel expression of “sheep and cattle”. Therefore, the answer of <b>Q25</b> is <b>four-legged friends</b> . Remember that the answer must be in plural form.	

26 Answer: **sofa sprouts**

Keywords in Questions	Similar words in Passage
<b>Q26: Lazy people</b> _____	Any assertion that statistics ‘prove’ vegetarians live longer must note that these vegetarians have already made (compared to the average sofa sprouts) a very rigorous and disciplined health-enhancing lifestyle change

**Note:**

Considering every details in the question and paragraph G, it can be seen that the phrase “**sofa sprouts**” is the parallel expression of “lazy people”.  
Therefore, the answer of **Q26** is **sofa sprouts**. Remember that the answer must be in plural form.

27 Answer: **C**

*Matching: People and opinions: Q27 - Q31*

**Strategy:**

*Scan read to find the names of the people*

*Read each opinion and then read the relevant section of the passage to see if it matches any of the people*

Keywords in Questions	Similar words in Passage
<b>Q27:</b> ___ led a new abstraction movement	His Simultaneous Windows is barely recognisable as a window—just a blend of prismatic hues with one prominent square, giving a hint of three-dimensionality.

**Note:**

After scanning the whole passage for the name of painters, we should look for the parallel expression of the question’s keyword “led a new abstraction movement” that may appear near the name of painters .

In the paragraph about Delaunay, it can be seen that “giving a hint of three-dimensionality” has a similar meaning with the phrase “led a new abstraction movement”

In paragraph 7, it is stated that **Delaunay’s** Simultaneous Windows gave a hint of three dimensionality, a new abstraction movement.

Therefore, the answer of **Q27** is **C**.

28 Answer: **B**

Keywords in Questions	Similar words in Passage
<b>Q28:</b> ___ was the most influential	They could have evolved their own awareness of Cubism more from Cezanne’s pervading and almost universal influence on the Parisian art scene of that day

**Note:**

After scanning the whole passage for the name of painters, we should look for the parallel expression of the question's keyword "the most influential" that may appear near the name of painters .

In the paragraph about Cezanne, it can be seen that "almost universal influence" has a similar meaning with the phrase "the most influential"

In paragraph 6, it is stated that **Cezanne** was the most influential on the Parisian art scene of that day.

Therefore, the answer of **Q28** is **B**.

29 Answer: **E**

Keywords in Questions	Similar words in Passage
<b>Q29:</b> ____ was affected by a global conflict	In his Railway Crossing. Merc, in spite of its non-representational quality, is the suggestion of the harsh mechanisation and alienation of modern life, a theme which the artist's experiences in World War One only accentuated, and which pre-dates similar trends (such as pop art) by decades.

**Note:**

After scanning the whole passage for the name of painters, we should look for the parallel expression of the question's keyword "was affected by a global conflict" that may appear near the name of painters .

In the paragraph about Leger, it can be seen that "artist's experiences in World War" has a similar meaning with the phrase "was affected by a global conflict"

It can be inferred from the paragraph about Leger that **Leger's** work (Railway Crossing. Merc) has a theme affected by a global conflict (World War One)

Therefore, the answer of **Q29** is **E**.

30 Answer: **F**

Keywords in Questions	Similar words in Passage
<b>Q30:</b> ____ is inevitably linked with an art movement	Braque's pre-war paintings began experimenting with this idea, which inevitably led to an association with Picasso, who had been dabbling also in rendering three-dimensional views into two-dimensional geometric shapes

**Note:**

After scanning the whole passage for the name of painters, we should look for the parallel expression of the question's keyword "inevitably linked with an art movement" that may appear near the name of painters .

In the paragraph about Picasso, it can be seen that "been dabbling also in rendering three-dimensional views into two-dimensional geometric shapes" has a similar meaning with the question's keyword.

In paragraph 3, it is stated that **Picasso** is linked with rendering three-dimensional views into two-dimensional geometric shapes (an art movement).

Therefore, the answer of **Q30** is **F**.

31 Answer: **C**

Keywords in Questions	Similar words in Passage
<b>Q31:</b> ___ was married	Robert Delaunay, who, together with his wife, regularly exhibited in Parisian salons with increasingly non-representational forms
<p><b>Note:</b></p> <p>After scanning the whole passage for the name of painters, we should look for the parallel expression of the question's keyword "was married" that may appear near the name of painters .</p> <p>In the paragraph about Robert Delaunay, it can be seen that "together with his wife" has a similar meaning with the phrase "was married"</p> <p>It can be inferred from paragraph 7 that <b>Robert Delaunay</b> was married.</p> <p>Therefore, the answer of <b>Q31</b> is <b>C</b>.</p>	

32 Answer: **D**

Keywords in Questions	Similar words in Passage
<b>Q32:</b> ___ a confusing abstraction in many colours	His Simultaneous Windows is barely recognisable as a window—just a blend of prismatic hues with one prominent square, giving a hint of three-dimensionality.
<p><b>Note:</b></p> <p>After scanning the whole passage for the name of paintings, we should look for the parallel expression of the question's keyword "a confusing abstraction in many colours" that may appear near the name of paintings .</p> <p>In the paragraph about Simultaneous Windows, it can be seen that "blend of prismatic hues" has a similar meaning with the phrase "many colours"</p> <p>In paragraph 7, it is stated that Delaunay's <b>Simultaneous Windows</b> is a blend of many colours.</p> <p>Therefore, the answer of <b>Q32</b> is <b>D</b>.</p>	

33 Answer: **C**

Keywords in Questions	Similar words in Passage
<p><b>Q33:</b> _____ a darker view, ahead of its time</p>	<p>In his Railway Crossing. Merc, in spite of its non-representational quality, is the suggestion of the harsh mechanisation and alienation of modern life, a theme which the artist's experiences in World War One only accentuated, and which pre-dates similar trends (such as pop art) by decades.</p>
<p><b>Note:</b>            After scanning the whole passage for the name of paintings, we should look for the parallel expressions of the question's keywords "a darker view" and "ahead of its time" that may appear near the name of paintings .            In the paragraph about Railway Crossing. Merc, it can be seen that harsh mechanisation and alienation of modern life" and "pre-dates similar trends" have similar meaning with the question's keywords.            In paragraph 8, it is stated that <b>Railway Crossing. Merc</b> has a dark view of the harsh mechanisation, alienation of modern life and its theme is ahead of its time.            Therefore, the answer of <b>Q33</b> is <b>C</b>.</p>	

34 Answer: **F**

Keywords in Questions	Similar words in Passage
<p><b>Q34:</b> _____ probably the first of its kind</p>	<p>Young Ladies of Avignon — often labelled 'proto-cubist'. Some even consider this painting to be the true beginning of Cubism itself</p>
<p><b>Note:</b>            After scanning the whole passage for the name of paintings, we should look for the parallel expression of the question's keyword "the first of its kind" that may appear near the name of paintings .            In the paragraph about Young Ladies of Avignon, it can be seen that "the true beginning of Cubism" has a similar meaning with the question's keyword.            In paragraph 3, it is stated that <b>Young Ladies of Avignon</b> is considered to be the first painting of Cubism.            Therefore, the answer of <b>Q34</b> is <b>F</b>.</p>	

35 Answer: **A**

Keywords in Questions	Similar words in Passage
<p><b>Q35:</b> _____ a n intriguing and multi-chromatic view</p>	<p>He combined vibrant hues in interesting and sometimes unusual combinations, such as in his still life, Newspaper and Fruit Dish</p>

**Note:**

After scanning the whole passage for the name of paintings, we should look for the parallel expressions of the question's keywords "intriguing" and "multi-chromatic" that may appear near the name of paintings .

In the paragraph about Newspaper and Fruit Dish, it can be seen that "interesting" and "vibrant hues" have similar meaning with the question's keywords.

In paragraph 7, it is stated that **Newspaper and Fruit Dish** has an interesting (intriguing) and multi-chromatic view.

Therefore, the answer of **Q35** is **A**.

36 Answer: **B**

Keywords in Questions	Similar words in Passage
<b>Q36:</b> _____ very representative of its type	Gris painted his well-known Portrait of Picasso, now regarded as one of the best examples of the Cubist style.
<p><b>Note:</b></p> <p>After scanning the whole passage for the name of paintings, we should look for the parallel expression of the question's keyword "very representative of its type" that may appear near the name of paintings .</p> <p>In the paragraph about Portrait of Picasso, it can be seen that "one of the best examples of the Cubist style" has a similar meaning with the question's keyword.</p> <p>In paragraph 6, it is stated that <b>Portrait of Picasso</b> is very representative of the Cubist style.</p> <p>Therefore, the answer of <b>Q36</b> is <b>B</b>.</p>	

37 Answer: **E**

Keywords in Questions	Similar words in Passage
<b>Q37:</b> _____ an early painting which influenced another	The Bathers. This work breaks tradition in its unflattering portrait of the women, whose naked forms are rendered in sharp symmetry, also forming a triangular pattern with the river and trees. It is said to have inspired Picasso's very similarly styled work mentioned previously.
<p><b>Note:</b></p> <p>After scanning the whole passage for the name of paintings, we should look for the parallel expression of the question's keyword "influenced another" that may appear near the name of paintings .</p> <p>In the paragraph about The Bathers, it can be seen that "have inspired Picasso's very similarly styled work" has a similar meaning with the question's keyword.</p> <p>In paragraph 5, it is stated that <b>The Bathers</b> influenced Picasso's very similarly styled work.</p> <p>Therefore, the answer of <b>Q37</b> is <b>E</b>.</p>	

38 Answer: **D**

Access <https://ieltonlinetests.com> for more practices

Keywords in Questions	Similar words in Passage
<p><b>Q38:</b> The Cezanne Retrospective was attended by Cezanne showed his Cubist paintings was attended by very many people influenced an artist to move to non representational style</p>	<p>He had seen the Cezanne 1907 retrospective, which enkindled interest in experimentation with geometric forms. This eventually led to the completely abstract, in which tubes, cones, and cubes, are all splayed on the canvas in bold primary colours — seen, for example, in his Railway Crossing. Merc, in spite of its non-representational quality</p>
<p><b>Note:</b></p> <p><b>A:</b> In paragraph 5, it is stated that several museums exhibited Cezanne’s paintings in a retrospective of his life after this artist died. It means that <b>he could not attend these Retrospective exhibitions</b>. Hence, <b>A</b> is not correct.</p> <p><b>B:</b> Paragraph 5 mentions about The Cezanne Retrospective exhibition. However, it is not stated which type of Cezanne’s paintings were exhibited. Hence, <b>B</b> is not correct.</p> <p><b>C:</b> Paragraph 5 mentions about The Cezanne Retrospective exhibition. However, it is not stated the attendance came to these exhibitions. Hence, <b>C</b> is not correct.</p> <p><b>D:</b> In paragraph 8, it stated that the Cezanne Retrospective influenced Leger to move to non representational style and his Railway Crossing. Merc is an example of this style. Therefore, the answer of <b>Q38</b> is <b>D</b>.</p>	

39 Answer: **D**

Keywords in Questions	Similar words in Passage
<p><b>Q39:</b> Many Cubist innovators preferred still-life paintings. favoured monochrome. invented names for their styles. were not adequately recognised.</p>	<p>Moving beyond those early years of Cubism, many other artists were exploring the same idea, but taking it in individual directions. They are often unfairly considered as having played less significant roles simply because they did not adhere to the strict perspectives of Braque or Picasso.</p>
<p><b>Note:</b></p> <p><b>A:</b> Newspaper and Fruit dish of Gris is the only still-life painting mentioned in the whole passage so that it cannot be concluded that many Cubist innovators preferred still-life paintings. Hence, <b>A</b> is not correct.</p> <p><b>B:</b> “Many favoured monochrome” – This information is not mentioned in the passage. Hence, <b>B</b> is not correct.</p> <p><b>C:</b> In the last paragraph, it is stated that styles of Cubism were invented long after the events and artworks which the artists attempt to describe. It means that <b>Cubist innovators did not invent names for their styles</b>. Hence, <b>C</b> is not correct.</p> <p><b>D:</b> In paragraph 6, it is stated that many Cubist artists were not adequately recognised. Therefore, the answer of <b>Q39</b> is <b>D</b>.</p>	

40 Answer: **C**

Keywords in Questions	Similar words in Passage
<p><b>Q40:</b> Cubism is fairly easily explained. has cubes in incoherent order. shows <b>different views</b> of a subject. was created by Picasso and Braque.</p>	<p>They can overlap, and sometimes <b>more than one view</b> is presented at the same time, moving beyond the limits of a fixed observer.</p>
<p><b>Note:</b></p> <p><b>A:</b> In paragraph 2, it is stated that <b>defining Cubism itself is difficult</b>. Hence, <b>A</b> is not correct.</p> <p><b>B:</b> In paragraph 2, it is stated that <b>the three-dimensional object being painted can be considered broken into pieces, sometimes square or cube-shaped</b>. It means that Cubism not only have cubes but also square shaped in less than coherent order. Hence, <b>B</b> is not correct.</p> <p><b>C:</b> It can be inferred from paragraph 2 that <b>Cubism shows different views of a subject</b>. Therefore, the answer of <b>Q40</b> is <b>C</b>.</p> <p><b>D:</b> In paragraph 1, it is stated that <b>claiming Picasso and Braque alone created Cubism oversimplifies a very complex issue</b>. It means that <b>Cubism was not created by these two artists alone</b>. Hence, <b>D</b> is not correct.</p>
